

0105

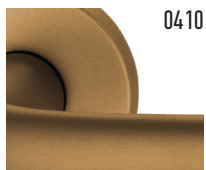

0205

FSB 0105 : Polished Aluminium Natural-Colour Anodised
FSB 0205 : Polished Aluminium German Silver-Colour Anodised

The eco-friendly lightweight. Right from the start, aluminium has been used as a high-tech material, when light weight and high durability are required. The 0105 finish is a classic satin anodised look and a match to most satin chrome hardware.

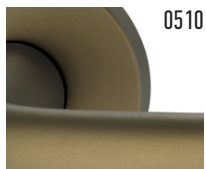

ANODISED ALUMINIUM

0410

0710

0510

0810

FSB 0410 : Blasted Aluminium Bronze Anodised
FSB 0510 : Blasted Aluminium Medium Bronze Anodised (C33)
FSB 0710 : Blasted Aluminium Dark Bronze Anodised (C34)
FSB 0810 : Blasted Aluminium Black Anodised (C35)

These anodised colours draw their influence from classic door fittings made from solid brass and bronze, but are an attractively priced alternative. Blasting an aluminium surface causes it to be compacted much in the same way as occurs during forging, as a result blasted anodised aluminium finishes are somewhat more resistant to knocks and scratches than traditionally worked and anodised aluminium.

ANODISED COLOURS

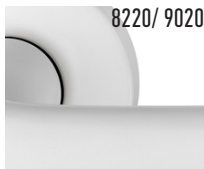

8802

8120

8821

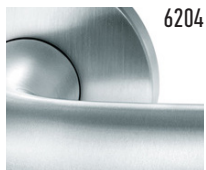

8220/ 9020

FSB 8802 : Anthracite Grey, approximating to RAL 7016, glossy
FSB 8821 : Grey Brown, approximating to RAL 8019, glossy
FSB 8120 : Jet Black, approximating to RAL 9005, matt
FSB 8220 : Traffic White, approximating to RAL 9016, glossy
FSB 9020 : Pure White, approximating to RAL 9010, glossy

FSB offers a limited range of powdercoat handles. FSB uses the cast and ground aluminium models from its standard range. Before painting, the parts are subject to a special, anodic oxidation. FSB then uses electrostatic powder coating. This is a solvent free painting process.

POWDERCOAT

6204

6205

FSB 6204 : Stainless Steel brushed satin matt
FSB 6205 : Stainless Steel polished

Stainless steel is an excellent choice for door and window hardware because its surface is extremely corrosion-resistant, hardly shows knock and scratch marks however roughly treated, is extremely hard-wearing, and is very easy to look after.

STAINLESS STEEL

7615

7625

FSB 7615 : Bronze Light Patinated Waxed
FSB 7625 : Bronze Dark Patinated Waxed

Fittings in bronze acquire added radiance over the years. They acquire a very special aesthetic appeal in the course of being used that testifies to a credible process of ageing and to something gained through change. Bronze is a living finish and is designed to age and patina over time.

BRONZE
