

1520/8813 LOCK & LATCH/ PRIVACY STRIKES

Standard and extended strikes are designed for use with the 1520/8813 mortice lock and latches, and mortice privacy locks. Strikes in these sizes in stainless steel are kept in stock.

For additional information on extended 1520/8813 strikes please see the extended strike sheet on the technical section of the website.

Please note:

- Strike plates are sold flat (not 'bent' along the leading edge), with counter sinking on both sides to allow for universal handing.
- Strike plates in stainless steel are 2mm thick.
- Stainless steel strike plates coloured to other finishes will require additional time to electroplate – additional costs will be advised before proceeding.
- Strike plates for rebated doors can also be provided – please contact your local Halliday + Baillie for further information.
